**ENOLIA** ADJUVANT CRISTAL A

Riddling agent for manual or automatic systems.

## 

- Riddling agent based on bentonite and potassium alginate for automatic or manual remuage systems:
- For agglomerating yeasts: LEVULIA AGGLO
- For traditional yeasts: **LEVULIA CRISTAL** or other yeasts suitable for refermentation
- For traditional BIO yeasts: LEVULIA PROBIOS

**ADJUVANT CRISTAL A** respects the analytical and organoleptic characteristics of the wine. It allows a rapid clarification of the wine after refermentation in the bottle in 2-7 days depending on the yeast used and the type of base wine and remuage system.

### $\rightarrow$ composition and technical characteristics

- Selected activated sodium bentonites
- Potassium alginate
- Potassium bisulphite

For oenological use, in compliance with the International Oenological Code.

## ••<del>)</del> Dosage

For traditional yeast: - 60 - 100 ml/hl

For agglomerating yeast:

- 10 20 ml/hl to add in the pied de cuve
- + 60 80 ml/hl to be added to the wine, at the moment of the addition of the pied de cuve

Maximum legal dose according to the European regulation in force.

# ADJUVANT CRISTAL A

### 

• Shake the product before use

#### Traditional yeast LEVULIA CRISTAL or LEVULIA PROBIOS:

• Dilute in water, 2-3 times its volume

• Add through a venturi meter, taking care to add at least 50% of the mass to be fermented, immediately after inoculation

• Keep in constant agitation once added

#### **LEVULIA AGGLO** agglomerating yeast:

• After diluting **ADJUVANT CRISTAL A** in 2 time its volume of water, add the equivalent of 10-20 ml/hl directly into the pied de cuvee immediately after the addition of the yeast

- Then add 60-80 ml/hl through the venturi system throughout the mass to be fermented
- Keep in constant agitation once added

#### 

- Do not dilute with wine
- Shaking the bottles is not recommended because it causes deposit breakage.
- In case of deposit breakage, wait 2 to 4 weeks before putting back into remuage
- Do not add at the same time with FORTIFIA CRISTAL

### 

Store in the original packaging, protected from light and humidity at a temperature between 5 and 10°C. Do not freeze. Respect the expiry date indicated on the label. Use quickly after opening.

- | L bottle in 20 L box (=  $20 \times$  | L)
- 5 L jugs in 20 L boxes (=  $4 \times 5$  L)
- 10 L just
