

FERMOL® Blanc DS

Active dry yeast for the fermentation of agave-based musts for the production of fine spirits such as tequila and mezcal

PRODUCT DESCRIPTION

FERMOL® BLANC DS is an active dry yeast selected for the fermentation of blue Weber agave (Agave tequilana) juices. Selected for its high tolerance to fermentative stresses, it ensures reliable performance under the challenging conditions of agave fermentation. It is apt to ferment high-gravity musts, withstanding elevated alcohol concentrations, and maintaining its efficiency at fermentation temperatures of 25–35°C. It offers faster fermentation kinetics, reducing process time while enhancing the development of esters and aromatics (fruity and floral notes), bringing about a refined tequila profile with mildly acidic notes. **FERMOL® BLANC DS** is ideal for both craft and industrial-scale tequila and mezcal production.

RECOMMENDED APPLICATIONS

This yeast is well-suited for the fermentation of:

- Tequila
- Mezcal

FERMENTATION PROPERTIES

YEAST SPECIES	<i>Saccharomyces cerevisiae</i>
