

# ADIX Liquid

.....  
 Additive for caustic solution of bottle cleaning and CIP stations  
 .....

## → DESCRIPTION

**Adix Liquid** is a liquid, slightly foaming additive, based on surfactants, suitable to bust cleaning power of caustic solutions in case of needs of removal fats and others organic.

**Adix Liquid** improves cleaning, wetting and sequestering power of alkaline solutions. The antifoaming patterns of **Adix Liquid** acts at temperature higher than 45-50°C.

## → TECHNICAL CHARACTERISTICS

Physical appearance: amber clear liquid  
 pH (sol. 1% at 20°C): 7,0 ± 0,5  
 Relative density at 20°C: 1,05 ± 0,05

The above indicated chemical-physical data represent the typical product's characteristic drawn from the analysis carried out on the product. These value are not a specification.

## → INSTRUCTIONS FOR USE\*

Use **Adix Liquid** dosing/adding slowly in circulating solutions in order to facilitate its dilution. Use at concentration 2-6% of the concentration of NaOH in solution. The right concentration must be evaluated considering the amount of contaminations and water hardness.

## → FIELDS OF APPLICATION

Alkaline cleaning of bottles. Tanks and circuits in CIP application.

## → COMPATIBILITY OF THE FORMULATION

**Adix Liquid** is compatible with most of the material normally present in Food Industry, if used according to the producer's indications. In case of doubt, carry out a test on the single material before using the product.

## ADIX Liquid

### → PRECAUTIONS FOR HANDLING AND STORAGE

Store the formulation in original packaging far from extreme temperatures. Consult the Material Safety Data Sheet.

### → PACKAGING

20 kg net drums.  
220 kg net drums.  
1.000 kg net IBC.

\*The indications have been established for general use conditions. For conditions differing from the norm, for example depending on the particular water hardness, the working method or cleaning problems, please consult us; our technical service will be pleased to advise you and to cooperate with you.
