

# DRYCLEAN NR

.....  
Alcohol-based sanitizer for hard surfaces formulated for the utilization in organic industries  
.....

## → DESCRIPTION

As defined by the Council Regulation (EC) No 834/2007 of 28 June 2007 on organic production "Organic production is an overall system of farm management and food production that combines best environmental practices (....) The organic production method thus plays a dual societal role, where it on the one hand provides for a specific market responding to a consumer demand for organic products, and on the other hand delivers public goods contributing to the protection of the environment(...)»

In this perspective, AEB has formulated a new line of detergents designed to reduce environmental impact of cleansing operations in organic companies.

The detergents of the NR line are optimized and targeted with a view to reducing the pollutant load of the spent solution and packed in 70% recycled "second life" plastic cans.

Among them **Dryclean NR** is a liquid ready to use sanitizer based on ethylic and isopropyl alcohol, suitable for final or intermediate treatment of hard surfaces of food industries.

**Dryclean NR** is particularly conceived for treatment of surfaces when the use of water and water solutions is not recommended.

**Dryclean NR** is suitable in production breaks in order to maintain the hygienic status of the surfaces and for cleaning of conveyors, fillers, devices and tools.

## → TECHNICAL CHARACTERISTICS

Physical appearance: colourless clear liquid

pH as it is:  $7 \pm 1$

Density: 0,90 - 1

Odour: characteristic of alcohol

The above indicated chemical-physical data represent the typical product's characteristics drawn from the analysis carried out on the product. These values are not a specification.

## → INSTRUCTIONS FOR USE\*

**Dryclean NR** it is to be used as it is by spray application on the surfaces to be treated.

## → FIELDS OF APPLICATION

Quick sanitization of surfaces in food industries. Treatment of devices and tools, conveyors and crates.

## DRYCLEAN NR

### → COMPATIBILITY OF THE FORMULATION

**Dryclean NR** is compatible with most material normally present in the Food Industry, if used according to the producer's indications. In case of doubt always evaluate the single material before the utilization. Contact with plastic surfaces subject to stress cracking (e.g. poly carbonate) must be avoid.

### → PRECAUTIONS FOR HANDLING AND STORAGE

Store in the original containers and avoid extreme temperatures. Consult the Material Safety Data Sheet.

### → TITRATION METHOD

Not aviable.

### → PACKAGING

0,75 kg net bottles in cartons containing 20 pieces.

\*The indications have been established for general use conditions. For conditions differing from the norm, for example depending on the particular water hardness, the working method or cleaning problems, please consult us; our technical service will be pleased to advise you and to cooperate with you.
