

# ANTIOXIN SB

.....  
 Beer antioxidizin agent  
 .....

## → TECHNICAL DESCRIPTION

**Antioxin SB** is a stabilizer specifically created by AEB to protect beer from oxidation for prolonged periods. The best possible protection against O<sub>2</sub> which enables an increased flavor stability of the beer and a decrease of O<sub>2</sub>.

## → COMPOSITION AND TECHNICAL CHARACTERISTICS

Potassium metabisulfite, and its equimolecular components with suitably buffered ascorbic acid.

## → DOSAGE

1-3 g/hL.

## → INSTRUCTIONS FOR USE

**Antioxin SB** should preferably be added immediately after fermentation and, at any rate, prior to bottling. The product can be added also during filtration, whereby contact with oxygen should be avoided as much as possible.

## → STORAGE AND PACKAGING

Store in a dry and cool place.

20 kg bags.
